

Conference Grantors

We gratefully acknowledge the following Grantors for their generous support in helping to make this conference possible.

The Certified Security Compliance Specialist™ (CSCS™) credential is a job-role based designation. This program is designed to enable professionals to understand, prioritize and ultimately assist organizations achieve compliance with information security-based regulations.

Compliance is big business. Legislations such as Sarbanes-Oxley, PIPEDA, FFIEC, HIPAA and standards such as the ISO 27002 (17799:2005) are a requirement for organizations to comply with. A key objective for organizations worldwide is to integrate security best practices and be in compliance. Skilled professionals who understand regulatory compliance requirements and information security are valued across several industries, especially healthcare, financial and the government.

The Certified Security Compliance Specialist™ (CSCS™) is a unique program of its type in the compliance and security industries - indeed the first of its type in the world. It is laser-beam focused on thoroughly examining compliance requirements and establishing best practices that can be applied in securing today's digital business information infrastructure.

Organizations are fast moving to a digital ecosystem that is governed by strict regulatory compliance requirements. Validate your compliance security skills and knowledge and distinguish yourself with the credential, Certified Security Compliance Specialist™ (CSCS™).

Davis Wright Tremaine's health information technology (HIT) practice group has decades of experience helping clients plan and implement health information sharing networks and exchanges, develop practical privacy and security policies and procedures, and acquire and implement the necessary technology. Our clients include startup and mature health information exchanges (HIEs), health care providers procuring and implementing HIT as a physician alignment strategy, HIT developers and vendors, and telemedicine providers. For more information, visit dwt.com/hit.

IBM is working with healthcare organizations around the world to:

- Contain costs, improve clinical outcomes and make operations more efficient.
- Use information predictively to improve quality and business performance and to help patients make smarter health and care decisions.
- Collaborate more effectively within and among organizations and empower patients to team with them to improve health and wellness.

Visit IBM to learn how together we can build a smarter health system. www.ibm.com/healthcare

TransEngen has developed an integrated platform capable of processing both healthcare and financial transactions. This platform provides the end-to-end connectivity between payers, providers and consumers that will drive efficiencies that reduce costs, streamline payments, and reduce provider collection efforts. With solutions directed at payers and providers, TransEngen is leading the transformation of the healthcare payments process; creating valuable new functionality at nearly every transaction stage and delivering real-time information at the point of care.
